

Doble implicacion con transformacion tambien de fotones a doble rotaciones (simetricas) en el sector cosmico?.

Double involvement with transformation also photon double rotations (symmetric) in the cosmic sector?.

$$\begin{aligned}Ta &= e^{-i(kx)} = \cos(kx) - i\sin(kx) \\ Tb &= e^{-i(-kx)} = \cos(kx) + i\sin(kx) \\ y(x) &= e^{-iKx} + e^{iKx} = 2\cos(kx) \\ y(x) &= 2\cos(kx)\end{aligned}$$

$$\begin{array}{ccc} & \text{Sector material} & \Leftrightarrow & \text{sector cosmico} \\ 1/\lambda = 0,5(1/T_a^2 - 1/T_b^2)(RS2) & & & \begin{aligned}Ta &= e^{-i(kx)} = \cos(kx) - i\sin(kx) \\ Tb &= e^{-i(-kx)} = \cos(kx) + i\sin(kx)\end{aligned}\end{array}$$

P.S.:

Before long, a new approach to science will open the way for a complete re-adjustment in mens attitude to the Reality in which we live. The new science will show humanity that all is One, that each fragmented part of which we are aware is intimately connected with all others, that that relationship is governed by certain laws, mathematically determined, and that within each fragment is the potential of the Whole. This new knowledge will transform mens experience of the world and of each other and confirm for them the truth that God and man are One. Thus, the new science will demonstrate mans divinity and will lead to the establishment of the New World Religion. The ancient schism between religion and science will be healed and a new impulse given to mans spiritual growth.

In this fertile climate, the hidden psychic powers of man will unfold naturally and the vast potential of the human mind will conquer space and time and control the energies of the universe itself. The resources of the human spirit are unlimited. In a crescendo of revelation, the glory of the unseen worlds will be revealed to mans astonished gaze and the full magnitude of the divine creation will be realized.
